Farrukh Iqbal Khan

National University of Science & Technology
Department of Computer Engineering
College of E&ME, Rawalpindi
Cell Phone: +92-321-5673801 Email: farrukh89@gmail.com

Education

NUST EME College–Rawalpindi	MS in Computer Engineering (CGPA: 3.13/4.00 at coursework completion)	2011-Thesis in progress
NUST SEECS–Islamabad	BE in Electronics Engineering (CGPA: 2.39/4.00)	2006-2010
Superior College, Lahore	HSSC (75.45%)	2004-2006
Divisional Public School, Lahore	SSC (77%)	2004

MS Thesis

"Saliency-aware Image fusion of Visual and IR images", currently reviewing the literature and conducting related experiments.

Academic Projects

Post-Graduate Projects

- **"Image up scaling using Iterative Curvature Based Interpolation**", drafted a research paper for *Digital Image Processing* course.
- **"Super Resolution using Linear Regression"** drafted a research paper using Generalized Linear Model for *Computer Vision* course.
- **"Design & implementation of a pipelined Math processor using Verilog HDL"**, implemented and verified the design on Spartan-3 FPGA for *Computer Architecture* course.
- "**A comparison of K-Nearest Neighbor Algorithm & Naïve Bayes Classifier"**, research project carried out for *Pattern Recognition* course.
- **"Speech synthesis using Linear Prediction coding (LPC)"**, implemented the design using Prony's algorithm on Matlab.

Last Updated: January 6, 2014

Undergraduate Projects

Final Year Project: **"Implementation of an IP based communication system for providing value added services using Asterisk PBX"**. The provided services included interactive voice response (IVR), call conferencing, voicemail, presence call routing.

Semester Projects:

- Scheduling heterogeneous wireless systems for efficient spectrum access
- Design of nMOS Field Effect Transistor using Cadence Tools
- FM Transmitter Design

Technical Skills

Software Tools:	Matlab, Xilinx ISE, Microsoft Office (Visio, Word, Excel & PowerPoint)
Languages:	Matlab, C++, Verilog HDL, Asterisk Extension Language (AEL)
Operating systems:	I have worked in both Linux (Ubuntu) & Windows environments.

Research Interests

Multimodal image registration, super resolution, image segmentation, multi resolution analysis, local image features, harmonic analysis (Fourier & wavelet domain processing).
